INTRODUCTION

Congratulations on your purchase of the MIDI Solutions Quadra Thru. The MIDI Solutions Quadra Thru provides four MIDI Thrus from one MIDI In, allowing additional MIDI Thrus to be added at any point in the MIDI chain. Active circuitry cleans up any skewing of the data bits that has occurred at the input, insuring accurate output signals. MIDI Solutions Quadra Thru is powered by the MIDI signal and requires no batteries or power supply to operate.

CONNECTIONS

Connect the **In** of the Quadra Thru to the MIDI Out or Thru of the sending MIDI device. Connect **Thru1**, **Thru2**, **Thru3**, and **Thru4** of the Quadra Thru to the MIDI In of the receiving MIDI devices. It is recommended that the number of MIDI Solutions products chained together between any two MIDI devices be limited to five.

OPERATION

The Quadra Thru's MIDI Indicator LED will light as soon as the sending device is turned on, and flashes whenever MIDI data passes through the unit. All MIDI messages appearing at the input are sent to Thru1, Thru2, Thru3, and Thru4.
